

Technical Specifications

Supply & output:

- Power Supply : 12 VDC *
- Operating Frequency : 20kHz to 60kHz
- Sound Output : 80dB to 110dB
- Power Consumption : < 0.7 W **

Notes:

* Operational upto 30 VDC.

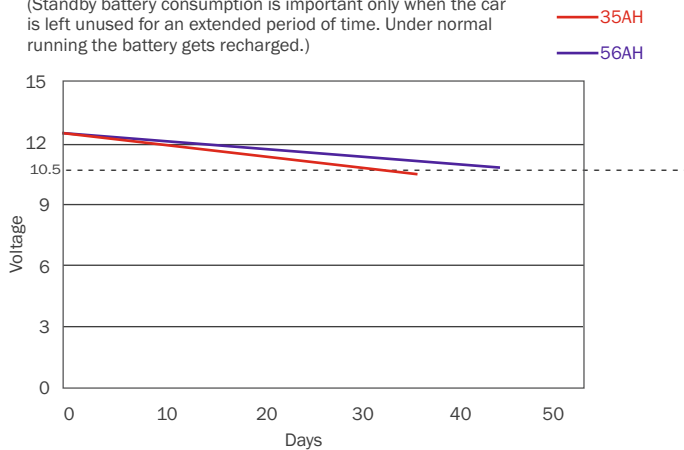

** Rated at 12VDC.

Fuse:

- Type : Mini Blade fuse
- Rating : 1 A

Typical standby battery consumption:

(Standby battery consumption is important only when the car is left unused for an extended period of time. Under normal running the battery gets recharged.)

Notes :

- The battery discharge curve does not include consumption of other equipment / devices like security systems which are also continuously powered by the battery.
- Typical self discharge rate of 4% per week is considered.
- Most car batteries fall within 35 to 56 AH range.

Dimensions:
